AFTER CARE INSTRUCTIONS

Please follow these instructions for 10-14 days after the procedure to improve and prolong the results of your new eyebrows. If you don't follow these instructions, it can greatly affect your microblading results! (<https://www.youtube.com/watch?v=RwbefEi47fU>)

I have applied a liquid barrier that will stay on and protect your eyebrows. **Avoid getting anything on the eyebrows, including water, except for cleansing as directed.** You may only blot for the first few hours with STERILE gauze (after washing your hands with antibacterial soap) to remove any excess fluids, if necessary.

Cleansing and Healing:

Thirty minutes post treatment, use the provided PhiWipe to cleanse the skin. Do NOT stretch or pull the skin, but blot until no other lymph is on the wipe. Apply the provided Phi Skin Candy ointment. Phi Skin Candy contains bees wax and other natural ingredients. Please consult your tech if you have allergies. In 2-3 hours, wash lightly with slightly damp Q-tips and antibacterial or green soap. When washing, it should be very gentle and with hardly any water. If your treatment was done in the evening and you cannot cleanse your brow a second or third time, put on the provided barrier film and sleep with it on. After the initial day of washing, you may very sparingly apply the provided balm (or coconut oil, for oily skin, if no allergy exists) to hydrate your brow area for dryness relief. Do not pick or rub the brows as flakes must fall off on their own or you will risk removing the color and possibly scarring.

- Do not soak the treated area in the bath, pool or hot tub. For 30 days, refrain from swimming in salt water, chlorinated pools, ponds, lakes, creeks, rivers, rainwater, saunas, hot yoga, steam rooms, or sun beds. Wear the provided shower cap over your brows when bathing or showering.
- No harsh exercise for 7 - 14 days. After 7 - 14 days – when exercising, wear a sweatband to avoid sweat on brow area.
- Do not expose treated area to direct sunlight. After healed (at least 30 days), use a sunscreen to avoid fading from the sun.
- No makeup should be applied directly on the brows during the healing process.
- You may find that your eyebrows will scab or become slightly dry following the treatment. If they itch, DO NO SCRATCH them. You may tap them to alleviate the itch.
- If your eyebrows get wet during the healing process, pat them dry with a towel, DO NOT RUB.
- Avoid using daily skincare products directly on the eyebrows.
- If you are planning a chemical peel, or any other medical procedure, please inform the technician of the procedure you have had. Procedure should only be done once the healing process is complete (at least 14 - 30 days).
- If you are due to give blood after the procedure, please inform your nurse about the microblading treatment you have had as this might alter the results.
- Call or email me with any questions or concerns – (YOUR PHONE NUMBER AND EMAIL)
